Adolescent substance abuse is the nation's #1 public health problem. It originates out of a developmental era where experimentation with the world is increasingly taking place, and where major changes in physical self and social relationships are taking place. These changes cannot be understood by any one discipline nor can they be described by focusing only on the behavioral and social problems of this age period, the characteristics of normal development, or the pharmacology and addictive potential of specific drugs. They require knowledge of the brain's systems of reward and control, genetics, psychopharmacology, personality, child development, psychopathology, family dynamics, peer group relationships, culture, social policy, and more. Drawing on the expertise of the leading researchers in this field, this Handbook provides the most comprehensive summarization of current knowledge about adolescent substance abuse. The Handbook is organized into eight sections covering the literature on the developmental context of this life period, the epidemiology of adolescent use and abuse, similarities and differences in use, addictive potential, and consequences of use for different drugs; etiology and course as characterized at different levels of mechanistic analysis ranging from the genetic and neural to the behavioural and social. Two sections cover the clinical ramifications of abuse, and prevention and intervention strategies to most effectively deal with these problems. The Handbook's last section addresses the role of social policy in framing the problem, in addressing it, and explores its potential role in alleviating it.

Contains information on a variety of subjects within the field of education statistics, including the number of schools and colleges, enrollments, teachers, graduates, educational attainment, finances, Federal funds for education, libraries, international education, and research and development.

Issued by the Nat. Center for Educ. Statistics (NCES). Provides a compilation of statistical information covering the broad field of American education from kindergarten through graduate school. Includes a selection of data from many sources, both government and private, and draws especially on the results of surveys and activities carried out by NCES. Chapters: (1) all levels of education; (2) elementary and secondary education; (3) post-secondary education; (4) federal programs for education and related activities; (5) outcomes of education; (6) international comparisons of education; and (7) learning resources and technology. Includes 33 figures and 434 tables.

This document, consisting of 7 chapters, 34 figures, 412 tables, plus 20 appended tables, provides statistical data on most aspects of U.S. education, both public and private, from kindergarten through graduate school. The chapters cover the following topics: (1) "All Levels of Education"; (2) "Elementary and Secondary Education"; (3) "Postsecondary Education" which include college and university education as well as vocational and adult education; (4) "Federal Programs for Education and Related Activities"; (5) "Outcomes of Education"; (6) "International Comparisons of "Education"; and (7) "Learning Resources and Technology." The publication contains information on a variety of subjects including the number of schools and colleges, teachers, enrollments, and graduates, in addition to educational attainment, finances, federal funds for education, employment and income of graduates, libraries, and international education. Supplemental information on population trends, attitudes on education, education characteristics of the labor force, government finances, and economic trends provides background for evaluating education data. Included among data not appearing in previous editions are the following: teachers' opinions on the education system; financial statistics of urban, suburban, and rural school districts; plans and activities of high school sophomores; public elementary and secondary school expenditures, by function and state; and international literacy and geography achievements of students. A short introduction provides a brief overview of current trends in American education, and each chapter highlights significant trends. Guides to tabular presentations and sources are provided along with definitions and an index. (MLF)

This edition is the 30th in a series of publications initiated in 1962. Its primary purpose is to provide a compilation of statistical information covering the broad field of American education from kindergarten through graduate school. The "Digest" includes a selection of data from many sources, and draws especially on the results of surveys and activities of the National Center for Education Statistics (NCES). The publication contains information on a variety of subjects, including: (1) numbers of schools and colleges; (2) numbers of teachers; (3) enrollments; (4) graduates; (5) educational attainment; (6) finances; (7) Federal funds for education; (8) employment and income of graduates; (9) libraries; and (10) international comparisons of education.

Supplemental information is provided on population trends, attitudes toward education, educational characteristics of the labor force, government finances, and economic trends. Some information is also given on preschool and adult education. Data are presented in 411 tables, with an additional 20 tables in an appendix. (SLD)
