This manual is a complete user manual for Garmin handheld receivers. It covers theory and practical applications for gps technology and the receivers that use this technology. Representative products for all of the Garmin handheld receivers, past and present, are explained and tips are given on getting the most out of each model. It is designed to augment the user manuals that are supplied with each product but is complete enough to replace them. While this manual is Garmin specific it provides a basic understanding of gps devices that is applicable to any gps receiver. It was written over a period of 4 years and has been reviewed and tested by hundreds of users over that period. It has been used as the reference for training on gps usage. Because of its unique approach that develops the theory behind operation as well as specific details, it provides a basis that will allow a user to be able to use any gps receiver. Skills in the use of a gps will provide assurance and safety for the user.

Frank J Larkin is a writer, mariner, and GPS expert.

Owning a boat involves sailors developing a whole new skill set and taking on a raft of new responsibilities, but this essential handbook takes the stress out of what should be an enjoyable, rewarding next step, and shares a wealth of practical advice on what might initially seem daunting new challenges. Drawn from over 35 years of the author's own experiences, this book is packed with expert wisdom and hand-holding guidance on every aspect of owning, equipping, maintaining, sailing and - of course - enjoying your first boat. Topics covered include: Choice of boat; Insurance; Assessing (and costing) moorings and berths; Navigation and safety equipment; Domestic equipment (galley, bedding, clothing, etc); Navigation (including in fog); Manoeuvring in close spaces; Sources of weather information and forecasts; Responsibilities towards crew; Catering and cooking; Maintenance advice (daily tips, winterising, engine servicing, fitting out for spring, etc); Paperwork (including customs forms); Dealing with emergencies; and more. Filled with colour photos and diagrams throughout, this comprehensive guide is indispensable for new skippers who have learned to sail at a sailing school or on a friend's boat and are ready to take the next step.

control and training technology. Topics addressed include: the design of control and display systems; human perception, error, reliability, information processing, and human perception, error, reliability, information processing, and awareness, skill acquisition and retention; techniques for evaluating human-machine systems and the physiological correlates of performance. This volume covers Human Factors in transportation systems. Part One opens with a chapter by Chris Wickens on attentional issues in head-up displays; its concluding chapter by Peter Jorna, pulls together the Human Factors issues in air traffic management from both the pilot 's and the air traffic controller 's perspectives. Part Two considers the ground-based aspects to air traffic control, while Part Three emphasizes the psychology of the individual. The opening chapter of Part Four uses lessons learned from aviation to avoid similar mistakes in road vehicles. The final part contains topics such as naval command and control, and automation in trains and armoured fighting vehicles.
