As you take this practice test, think about pacing yourself. In order to complete the final exam, you should be spending less time on multiple choice than short answer. If you take this practice test in one sitting, aim to keep your time under an hour. Cheating on this would just be silly, as it has no direct bearing on your grade in the class.

~~Algebra II Practice Questions For The Final Exam ...~~

To find the value of y, substitute 2 for x in the first equation. $y = -3(2) + 4 = -6 + 4 = -2$. Therefore, the solution of the given system of equations is $x = 2, y = -2$. Check this solution by substituting the values into the second equation and making sure the resulting equality is true. 2. A.
