The Guide to International Legal Research is an authoritative and comprehensive reference tool for law students and practitioners. Authored annually by The George Washington International Law Review, the Guide is designed to assist both novices and professionals with their international legal research. Following an introduction by Professor Christopher J. Borgen, the Guide is organized into two parts. In the first part, chapters are divided by regions. Each regional chapter includes an overview of the geopolitical climate in that region and lists government resources, legal resources, media resources, and resources by topic. Where appropriate, these sources are subdivided by country. Many of the chapters discuss general multi-national organizations as well as international trade organizations and agreements that are specific to the region. The Guide also provides an overview of what each source covers and how it can be most effective. The second part of the Guide covers substantive areas of international law, including general international law, public health law, space law, human rights law, group rights, intellectual property, international trade, international business transactions, tax law, environmental law, labor law, and international security law, among other topics. Much like the regional sections, the substantive chapters begin with a section on international governance followed by a section on secondary sources pertinent to that subject area.

"You forget. You forget you don't really exist here, that this isn't your home." Since emigrating from Bangladesh, fourteen-year-old Nadira and her family have been living in New York City on expired visas, hoping to realize their dream of becoming legal U.S. citizens. But after 9/11, everything changes. Suddenly being Muslim means you are dangerous -- a suspected terrorist. When Nadira's father is arrested and detained at the U.S.-Canadian border, Nadira and her older sister, Aisha, are told to carry on as if everything is the same. The teachers at Flushing High don't ask any questions, but Aisha falls apart. Nothing matters to her anymore -- not even college. It's up to Nadira to be the strong one and bring her family back together again.

As LGBTQ claims acquire global relevance, how do sexual politics impact the study of International Relations? This book argues that LGBTQ perspectives are not only an inherent part of world politics but can also influence IR theory-making. LGBTQ politics have simultaneously gained international prominence in the past decade, achieving significant policy change, and provoked cultural resistance and policy pushbacks. Sexuality politics, more so than gender-based theories, arrived late on the theoretical scene in part because sexuality and gender studies initially highlighted post-structuralist thinking, which was hardly accepted in mainstream political science. This book responds to a call for a more empirically motivated but also critical scholarship on this subject. It offers comparative case-studies from regional, cultural and theoretical peripheries to identify ways of rethinking IR. Further, it aims to add to critical theory, broadening the knowledge about previously unrecognized perspectives in an accessible manner. Being aware of preoccupations with the de-queering, disciplining nature of theory establishment in the social sciences, we critically reconsider IR concepts from a particular LGBTQ vantage point and infuse them with queer thinking. Considering the relative dearth of contemporary mainstream IR-theorizing, authors ask what contribution LGBTQ politics can provide for conceiving the political subject, as well as the international structure in which activism is embedded. This book will be of interest to students and scholars of gender politics, cultural studies and international relations theory.

In the current processes of political, economic and cultural changes serious cross-border forms of organized crime receive unprecedented attention as spectacular global media events, as 'threats' of all sorts, and as priority targets of criminal policy and political agendas. Most books on 'global organized crime' focus on one particular region, topic or event, and are written from one specific theoretical and disciplinary framework. The renowned scholars who have contributed to this volume present up-to-date expertise on regions as distant and different as Russia, Colombia, the Netherlands, Israel, Peru and Britain. They tackle phenomena such as international drug trafficking, alien and women smuggling, terrorism, East European organized crime and financial crimes. They show not only how these issues are interrelated, but also the way in which they interact with social, economic and political legitimate structures. The contributors critically question the policies and strategies currently pursued. They explore different theoretical arguments from the perspective of their own disciplines, which include economics, criminology, political science and anthropology.

This collection of essays explores the evolution of anti-discrimination law in European civil law jurisdictions. Historically, scholarship in this area has focused on the common law, which has also taken the lead in developing the theory and practice of anti-discrimination law. This volume breaks new ground by offering a sustained, critical, legal and socio-legal, comparative look at how anti-discrimination is faring in European civil law environments. While it is true that anti-discrimination law is seen as a foreign transplant in some regions, it does not fare poorly across the board. As shown by the case studies herein, the success of anti-discrimination law is found to vary according to its national context, the actors involved, and the evolution of the particular concept or ground of discrimination in question.
