If I built a car, it'd be totally new! Here are a few of the things that I'd do. . . . Young Jack is giving an eye-opening tour of the car he'd like to build. There's a snack bar, a pool, and even a robot named Robert to act as chauffeur. With Jack's soaring imagination in the driver's seat, we're deep-sea diving one minute and flying high above traffic the next in this whimsical, tantalizing take on the car of the future. Illustrations packed with witty detail, bright colors, and chrome recall the fabulous fifties and an era of classic American automobiles. Infectious rhythm and clever invention make this wonderful read-aloud a launch pad for imaginative fun.

The first "manned" hot-air balloon is about to take off! But what are those noises coming from the basket? Based on the (POSSIBLY) true report of a day in 1783, this si the story of (PERHAPS) the bravest collection of flyers the world has ever seen, as (SORT OF) told to Marjorie Priceman.

Science Starters: Physical and Earth Science Course Description This is the suggested course sequence that allows one core area of science to be studied per semester. You can change the sequence of the semesters per the needs or interests of your student; materials for each semester are independent of one another to allow flexibility. Semester 1: Physical Science Investigate the Possibilities Elementary Physical Science-Forces & Motion From High-speed Jets to Wind-up Toys: Elementary physical science comes alive in this amazing full-color book filled with 20 hands-on activites that ignite a sense of curiosity about the wonderful world God has made. Concepts are introduced in an engaging way-by highlighting the science behind kids at play, like rollerskating, skateboarding, and even running. By guiding students through these easy to understand investigations, they learn to explain, apply, expand, and assess what they have personally observed! Learn how to determine the speed and motion of favorite toys, create a catapult and experience the mechanics of pulleys, set up a floating pencil race, discover why friction creates heat. Semester 2: Earth Science Investigate the Possibilities Elementary Earth Science-The Earth Its Structure & Its Changes: Experience the science of fun! Explore the planet like never before with 20 fun and educational experiments. The learning progression helps students engage, investigate, explain, apply, expand, and assess the scientific principles, and is filled with helpful images, diagrams, and inexpensive activities. Students discover why caves and sinkholes form, what is in the soil we walk on every day, how warning signs are present prior to volcanic eruptions, what tests can be used to identify rocks, and more. This comprehensive series makes the study of God’s creation both enjoyable and educational!

Haven't you ever wondered ... Where do balloons go when you let them go free? It can happen by accident. It happened to me. Do they tango with airplanes? Or cha-cha with birds? Can plain balloons read balloons printed with words? When one little boy accidentally lets go of his balloon, his imagination takes him on its journey. Jamie Lee Curtis's gentle and humorous exploration of the joys and perils of a balloon's life is whimsically brought to life by Laura Cornell's illustrations. From the best-selling author-illustrator team of Today I Feel Silly and Other Moods that Make My Day comes another delightful mystery about letting go. Includes cool reusable stickers and two play areas!

"Includes over 600 activities." Reproducibles.

Instant English lessons – learn in a flash! TEFL Lesson Plans For Dummies is a ready-made course manual for TEFL teachers. With fully fleshed-out lessons, activities, tools, games, and resources, this book contains what is essentially an instant TEFL course. Use the ready-made materials directly in the classroom, or follow along with the detailed planning models and frameworks to grow your skills while designing your own lesson plans more effectively. The book includes access to online materials you can print for use in class, and the lessons can be used with or without the aid of technology in the classroom. You'll find expert advice on teaching all age levels and class sizes, including ideas for taking the lessons out into the world. Many EFL/ESL teachers have little or no experience, and may have only been in the profession for a limited time. TEFL Lesson Plans For Dummies saves the day with materials, ideas, and activities that can be implemented quickly and easily, making lessons more productive and fun. From quick exercises to larger-scale plans, this book contains hundreds of ways to help your students become more proficient English speakers. Implement expertly-designed planning models with step-by-step advice Teach lessons designed for students of all ages and classes of all sizes Integrate technology when it's available, or do without it when it's not Move your lessons outside of the classroom for deeper immersion Whether you're taking a TEFL training course, about to head out on your first job, or a veteran of the field, this book provides you with the tools you will need to get things moving in class. If you're looking to cut down on planning time without sacrificing student engagement, TEFL Lesson Plans For Dummies is the classroom-ready resource you need.

Technology Integration and High Possibility Classrooms provides a fresh vision for education in schools based on new research from in-depth studies of technology integration in exemplary teachers’ classrooms. This timely book meets the demand for more examples of effective technology integration by providing a new conceptual understanding that builds on the popular and highly influential theoretical framework of technological, pedagogical and content knowledge (TPACK). Technology Integration and High Possibility Classrooms details four rich case studies set in different contexts with students ranging from age 6 to 16. Each case study articulates in very practical terms what characterizes exemplary teachers’ knowledge of technology integration and how that is applied in classrooms. This highly accessible book clearly demonstrates how theory informs practice and provides new possibilities for learning in twenty-first-century schools.

Everyone’s a New Yorker on Thanksgiving Day, when young and old rise early to see what giant new balloons will fill the skies for Macy’s Thanksgiving Day Parade. Who first invented these "upside-down puppets"? Meet Tony Sarg, puppeteer extraordinaire! In brilliant collage illustrations, Caldecott Honor artist Melissa Sweet tells the story of the puppeteer Tony Sarg, capturing his genius, his dedication, his zest for play, and his long-lasting gift to America—the inspired helium balloons that would become the trademark of Macy’s Parade. Winner of the 2012 Robert F. Sibert Medal and the NCTE Orbis Pictus Award.

Build the essential 4—creativity, collaboration, communication, and critical thinking! Go beyond theory and learn how to systematically integrate STEAM and Maker spaces that prepare students for real-world experiences. This engaging resource outlines step-by-step processes to help anyone start their STEAM and Maker journey. Includes charts, checklists, web links, and profiles to help you make meaningful subject area connections and tap your students’ natural curiosity. You’ll learn to: Integrate STEAM and Making into daily practice Differentiate instruction for all learners Align with core standards and The Next Generation Science Standards
