This central section of the Handbook Of Arbitration Practice does more than give good advice to arbitrators, the parties, and their representatives. Both in its text and its appendices it provides checklists which should always be on hand: the listing of the issues to be decided, the importance of each of them, the time it will take to decide them and the amount that each of them represents (see pages 136–137); and the listing of the objects of note-taking and the various methods of note ...

Law and Practice of International Commercial Arbitration.

The Practitioner's Handbook on International Arbitration and Mediation, 3rd Edition is a unique work with each chapter written by a well-known practitioner and expert in the field. It covers each step of the international arbitration and mediation process and offers separate chapters that summarize the laws of leading arbitral venues. This Handbook is intended to make the reader into a better practitioner or arbitrator/mediator. Moreover, each chapter has been written to provide practical advice and guidance. Unlike many works with multiple authors, this work is not simply a collection of essays on a general subject. This book is a unified work with cross references among the chapters and a consistent format throughout. The Practitioner's Handbook is divided into three parts. Part One describes in detail each step of the international arbitration process and offers tips. Part Two deals with each step and facet of an international mediation. Each of these chapters is filled with Practitioners' Expert Commentary. Part Three summarizes the laws of leading arbitral jurisdictions, like Hong Kong, England, Switzerland, and France. These chapters give you detailed guidance on the laws governing international arbitration in that particular jurisdiction. As a result, the chapters in Part Three are a bit more technical as the authors realized that the reader would need citations to and commentary on the local arbitration statutes and rules. The CD ROM that accompanies this Work contains relevant original source material that is germane to the text. A review of the table of contents of the material contained on the CD ROM will acquaint you with the range of material covered.

Jurisdiction and arbitration clauses are two different mechanisms that help to ensure impartiality and predictability in international dispute resolution. Despite their benefits, these clauses can be inconvenient for parties that are forced to litigate before distant fora. Moreover, particular problems arise in the context of maritime transport documents. Based on a broad comparative approach, this study seeks to explain the existing rules within their legal context and to develop a coherent system for such clauses, which takes into account the underlying interests as well as economic theory. While offering detailed answers to most issues surrounding jurisdiction and arbitration clauses in maritime transport documents, the book confronts the fundamental question of the limits of freedom of contract in an international setting.

This handbook provides up-to-date information on the various forms of dispute resolution which have recently become available and discusses the more established procedures. It is written by a team of chartered engineers with hands-on experience and practising barristers from one of the UK's top specialist chambers who deal exclusively with engineering and construction disputes in straightforward language, without jargon and without assuming prior knowledge.

Architect's Legal Handbook is the most widely used reference on the law for architects in practice, and the established leading textbook on law for architectural students. The ninth edition includes all the latest development in the law that affect an architect's work, and comprehensive coverage of relevant UK law topics. Most significantly, the chapter on the JCT contracts has been completely revised to cover the 2005 update. Contributions by the foremost legal and architectural experts in the UK Full coverage of the JCT 2005 update New chapter on procurement Selected bibliography provides useful references to further reading Tables of Cases, Statutes and Statutory Instruments provide full referencing for cited cases Architect's Legal Handbook is the essential legal reference work for all architects and students of architecture.
