Binomial Probability Multiple Choice Questions Answer

When somebody should go to the book stores, search creation by shop, shelf by shelf, it is essentially problematic. This is why we provide the ebook compilations in this website. It will unconditionally ease you to look guide **binomial probability multiple choice questions answer** as you such as.

By searching the title, publisher, or authors of guide you in point of fact want, you can discover them rapidly. In the house, workplace, or perhaps in your

An algebra 2 test has 6 multiple choice questions with four choices with one correct answer each. If we just randomly guess on each of the 6 questions, what is the probability that you get exactly 3 questions correct? (You need to figure out the p value first. It is not given to you.)

~~Binomial Distribution | Probability Quiz - Quizizz~~

1 Answer1. Show activity on this post. $f(k; n, p) = \binom{n}{k} p^k (1 - p)^{n - k}$. Here, $k = 8$, $n = 10$ and $p = 1 / 4$. Plug in and crunch. If however, you want to know the probability that Jim gets at least 8 correct, you simply need to sum. $f(8; 10, 1 / 4) + f(9; 10, 1 / 4)$
