A 1-year license to an engaging alternative to hands-on dissection that allows students to explore the skeleton, muscles, and internal anatomy of the cat. Students examine the cat's skeletal and muscular systems. They learn each muscle's location, origin, insertion, and function. Students then dissect the digestive, circulatory, and reproductive systems.

The Circulatory System Dissection

Activity Separate the diaphragm from the interior wall of the ribs. Push back the ribs to lay the thoracic cavity open as much as possible. Cut each rib near the base, where it attaches to the vertebra. The heart is located in the center of the thoracic cavity and is covered by the pericardium, a tough membrane.
