*Claims Evidence And Reasoning Nsta*

It maintains the original argumentative style of writing (claims, evidence, and reasoning) that is often lacking in textbooks. It provides an opportunity for students to reason about competing claims with multiple pieces of authentic scientific evidence at a level that is developmentally appropriate. An example of an APL article is shown in Figure 2

*They Really Used to Think That? | NSTA*

Claim Evidence Reasoning. A statement or conclusion that answers the original question/problem. Scientific data that supports the claim. The data needs to be appropriate and sufficient to support the claim. A justification that connects the evidence to the claim.

*Claim Evidence Reasoning - National Science Teachers ...*

Scientists use their research and observations to make a claim and then describe the evidence that led them to make that claim and explain how they used reason when looking at evidence. Argumentation is particularly relevant because making claims and supporting them with evidence are intricately tied to reading and writing.
