practice. Includes new chapters on the Microbiota in Immunity and Inflammation, Immune Responses to Fungi, and Genetics and Genomics of Immune Response. Features extensive revisions to many chapters, including the Major Histocompatibility Complex, Multiple Sclerosis, Diabetes and Related Autoimmune Diseases, Biologic Modifiers of Inflammation and Tumor Immunotherapy. Covers hot topics such as the role of genetics and genomics in immune response and immunologic disease, atherosclerosis, recurrent fever syndromes, aging and deficiencies of innate immunity, the role of microbiota in normal immune system development and the pathogenesis of immunologic and inflammatory diseases, and novel therapeutics. Addresses notable advances in key areas such as the importance of the microbiota to normal immune system development and to the pathogenesis of immunologic and inflammatory diseases; relationships between the innate and adaptive immune systems; progress in rapid and cost-effective genomics; cell signaling pathways and the structure of cell-surface molecules; and many more. Summarizes promising research and development anticipated over the next 5-10 years with "On the Horizon" boxes and discussion of translational research.

Advanced Clinical Naturopathic Medicine engages the reader and evolves their knowledge and understanding from the fundamental Clinical Naturopathic Medicine to a more specialised focus. Written by Leah Hechtman, it concentrates on advanced topics commonly encountered in clinical practice, including new advancements and cutting-edge research, as well as foundational aspects of clinical practice. This new title showcases how transformative and effective
