Virtually all crayfish culture also relies on natural reproduction rather than stocking hatchery-reared juveniles. The predominant cultured species in North America, the red swamp (Procambarus clarkii) and white river crayfish (P. zonangulus), are classified as “ temperate ” species; that is, they will tolerate cold winter conditions. Both species, however, possess a number of traits that are usually associated with animals that live in warm waters.

Freshwater Crayfish Aquaculture in North America, Europe ...

The crayfish used in the form of fish bait and crayfish introduction into streams and natural lakes is illegal in many different states. The transport and importation of crayfish is regulated to limit the nonnative species introduction, which will end up eliminating the fish and native crayfish, Similar to Red Swamp Crayfish, they are considered as being invasive species which are prohibited ...

Buy Freshwater Crayfish Aquaculture in North America ...

The red claw crayfish (*Cherax quadricarinatus*), referred to throughout the rest of this fact sheet simply by its Australian synonym 'redclaw', is a tropical species native to the rivers of north-west Queensland and the Northern Territory in Australia. Although well known to the local inhabitants of this isolated region, it remained effectively unknown to the rest of the world until the late 1980s, when it was trialled for aquaculture.
