Garlic and Other Alliums. The Lore and the Science. By ...

Garlic belongs to a category called allium vegetables. They also include onions, chives, leeks, and shallots. Botanically, garlic is a vegetable that belongs to the onion family. As a food, you'll probably use it like an herb or spice. Regardless, you're probably not eating enough garlic, onions, and other nutrient-rich vegetables. You might not care for their pungent odor. Allium vegetables might seem difficult to cook with.

This book is essentially the story of a life devoted to garlic, with onions, leeks and other alliums invited on board during the course of the journey. The life is that of a distinguished research chemist. Avoiding hyperbole and thoroughly referenced, the subject is covered in just over 400 pages.

Garlic and other alliums | Review | RSC Education

Allium is a genus of monocotyledonous flowering plants that includes hundreds of species, including the cultivated onion, garlic, scallion, shallot, leek, and chives. The generic name Allium is the Latin word for garlic, and the type species for the genus is Allium sativum which means "cultivated garlic". Carl Linnaeus first described the genus Allium in 1753. Some sources refer to Greek ἀλῆω by reason of the smell of garlic. Various Allium have been cultivated from the earliest times ...

Allium - Wikipedia

Garlic (Allium sativum) is a species in the onion genus, Allium.Its close relatives include the onion, shallot, leek, chive, and Chinese onion. It is native to Central Asia and northeastern Iran and has long been a common seasoning worldwide, with a history of several thousand years of human consumption and use. It was known to ancient Egyptians and has been used as both a food flavoring and a ...

Garlic - Wikipedia

Allium tricoccum (commonly known as ramp, ramps, ramson, wild leek, or wood leek) is a North American species of wild onion widespread across eastern Canada and the eastern United States. Many of the common English names for this plant are also used for other Allium species, particularly the similar Allium ursinum which is native to Europe and Asia.
