Growth, Maturation, and Physical Activity by Malina ...  
Phase 1: At the same time of the rapid growth in the brain and nervous system, there is also rapid physical development in the first few years of life before it begins to slow into steady growth during mid-to-late childhood (Phase 2). This is easier to see on a growth velocity curve but the average rate of growth in height is about 5-6 cm or so (2+ inches) per year between the ages of 4-5 and the onset of the adolescent growth spurt (10 in girls and 12 in boys, on average).
