What is Hand Hygiene?

Broadly, traditional solid soap bars tend to be made from a combination of fat or oil, water and an alkali substance such as lye. Liquid soap, or hand wash, is made from synthetic detergents, such as sodium lauryl ether sulfate, instead. Ideally, choose one with moisturising agents, as this will help to offset frequent hand washing.

Hand hygiene, soap and sanitiser gel: what you need to ...

Practicing hand hygiene is a simple yet effective way to prevent infections. Cleaning your hands can prevent the spread of germs, including those that are resistant to antibiotics and are becoming difficult, if not impossible, to treat. On average, healthcare providers clean their hands less than
