Patrik Wikström and Robert DeFillippi bring together innovative, multidisciplinary perspectives on business innovation and disruption in the music industry. Authors from fields such as cultural studies, economics, management, media studies, musicology and human geography in North America, Europe and Asia focus on the "second wave" of digital disruption and the transformation of the music industry. The chapters are structured into three parts: the first part contextualizes changes in the music industry that have been driven by digital technologies since the end of the 1990s. The second part unpacks the impact of these disruptive technologies on business models in specific industry sectors and geographies, and the third and final part examines questions related to the emergence of subscription music services. Concluding chapters link back to the role of hackers as a subversive and innovative force in the music economy and examine how hacker creativity can be facilitated and encouraged to generate the next big music industry innovation. This multifaceted look at the music business will serve as a resource for both undergraduate and graduate students, as well as established scholars and industry professionals.

The field of popular music production is overwhelmingly male dominated. Here, Paula Wolfe discusses gendered notions of creativity and examines the significant under-representation of women in studio production. Wolfe brings an invaluable perspective as both a working artist-producer and as a scholar, thereby offering a new body of research based on interviews and first-hand observation. Wolfe demonstrates that patriarchal frameworks continue to form the backbone of the music industry establishment but that women's work in the creation and control of sound presents a potent challenge to gender stereotyping, marginalisation and containment of women's achievements that is still in evidence in music marketing practices and media representation in the digital era.

The book is like a delicious smörgåsbord with a variety of contributions within creative industries research. David Rylander, Papers in Regional Science This book positions itself with an international approach and with a focus on entrepreneurship. My perception is that this will be read with major interest by policymakers around the world, who right now consider how to form strategies and construct policies to support their own creative industries. . . The book raises interesting aspects of creative industries in comparison to more traditional industries. . . Charlotta Mellander, International Small Business Journal This collection of papers adds some new dimensions to the current creative entrepreneurship research agenda. It highlights the valuable economic and social contribution of the sector but also encourages policymakers, educators and trainers to continue to evaluate the critical role they play in the creative enterprise development process. Culturelink . . . a delight to read. The book is novel and covers an important area of entrepreneurship that is definitely worthy of more attention. The book is useful to practitioners in the creative industries field that want to learn more about the international importance of the sector and also to academics who conduct research in the area. Vanessa Ratten, Journal of Enterprising Communities There is increasing conversation about this industry at conferences around the world. This book would be helpful in putting definitional boundaries around the topic and bringing together the latest research on the topic. It has an automatic international scope, has an interesting selection of subtopics including gender, trends, and economic contributions and is cleverly organized. Patricia G. Greene, Babson College, US The creative industries represent a vital, exciting and rapidly changing field of activity; one that is now recognised as a key growth sector in the knowledge-based economy. However, there is still a general lack of understanding of what is meant by the term creative industry , and the creative sector has not, to date, been the subject of concerted academic research. This book redresses the balance by providing valuable insights into the creative entrepreneurial process and platforming some of the key challenges yet to be addressed. A range of pertinent and diverse topics relating to creative entrepreneurship are dealt with, including the different quantitative and qualitative methodologies adopted by researchers in this field. In addition, the nature of creative entrepreneurship across different industry sub-sectors and in different economic and geographical contexts is examined. Illustrating the valuable economic and social contribution of the creative industries sector, Entrepreneurship in the Creative Industries aims to encourage policymakers, educators and trainers to continue to evaluate their critical role in the creative enterprise development process. Students and researchers in entrepreneurship and creative industries fields will also find the book to be an illuminating read.
