"The Committee on Payment and Settlement Systems (CPSS) publishes - under the aegis of the Bank for International Settlements (BIS) - reference works on the payment systems and other financial market infrastructures of various countries, widely known as Red Books. The Red Book for the CPSS countries was last published in April 2003. After the enlargement of the CPSS to 24 countries in 2009, this edition of the Red Book for the CPSS countries is in two volumes"--Foreword.

It's no secret that certain social groups have predominated India's business and trading history, with business traditionally being the preserve of particular 'Bania' communities. However, the past four or so decades have seen a widening of the social base of Indian capital, such that the social profile of Indian business has expanded beyond recognition, and entrepreneurship and commerce in India are no longer the exclusive bastion of the old mercantile castes. In this meticulously researched book ? acclaimed for being the first social history to document and understand India's new entrepreneurial groups ? Harish Damodaran looks to answer who the new 'wealth creators'? are, as he traces the transitional entry of India's middle and lower peasant castes into the business world. Combining analytical rigour with journalistic flair, India's New Capitalists is an essential read for anyone seeking to understand the culture and evolution of business in contemporary South Asia.

"This book is designed to provide the reader with an insight into the main concepts involved in the handling of payments, securities and derivatives and the organisation and functioning of the market infrastructure concerned. Emphasis is placed on the general principles governing the functioning of the relevant systems and processes and the presentation of the underlying economic, business, legal, institutional, organisational and policy issues. The book is aimed at decision-makers, practitioners, lawyers and academics wishing to acquire a deeper understanding of market infrastructure issues. It should also prove useful for students with an interest in monetary and financial issues."--Introduction (Pg. 20, para 8).

By the New York Times bestselling author of The Bone Clocks and Cloud Atlas | Longlisted for the Man Booker Prize Selected by Time as One of the Ten Best Books of the Year | A New York Times Notable Book | Named One of the Best Books of the Year by The Washington Post Book World, The Christian Science Monitor, Rocky Mountain News, and Kirkus Reviews | A Los Angeles Times Book Prize Finalist | Winner of the ALA Alex Award | Finalist for the Costa Novel Award From award-winning writer David Mitchell comes a sinewy, meditative novel of boyhood on the cusp of adulthood and the old on the cusp of the new. Black Swan Green tracks a single year in what is, for thirteen-year-old Jason Taylor, the sleepest village in midwest Worcestershire in a dying Cold War England, 1982. But the thirteen chapters, each a short story in its own right, create an exquisitely observed world that is anything but sleepy. A world of Kissingeresque realpolitik enacted in boys' games on a frozen lake; of "nightcreeping" through the summer backyards of strangers; of the tabloid-fueled thrills of the Falklands War and its human toll; of the cruel, luscious Dawn Madden and her power-hungry boyfriend, Ross Wilcox; of a certain Madame Eva van Outryve de Crommelynck, an elderly bohemian emigré who is both more and less than she appears; of Jason's search to replace his dead grandfather's irreplaceable smashed watch before the crime is discovered; of first cigarettes, first kisses, first Duran Duran LPs, and first deaths; of Margaret Thatcher's recession; of Gypsies camping in the woods and the hysteria they inspire; and, even closer to home, of a slow-motion divorce in four seasons. Poignant, funny, profound, left-field, elegiac, and painted with the stuff of life, Black Swan Green is David Mitchell's subtlest and most effective achievement to date. Praise for Black Swan Green "[David Mitchell has created] one of the most enduring, smart, and funny young narrators ever to rise up from the pages of a novel. . . . The always-fresh and brilliant writing will carry readers back to their own childhoods. . . . This enchanting novel makes us remember exactly what it was like."—The Boston Globe "[David Mitchell is a] prodigiously daring and imaginative young writer. . . . As in the works of Thomas Pynchon and Herman Melville, one feels the roof of the narrative lifted off and oneself in thrall."—Time

The Challenge of Sustainability: Corporate Governance in a Complicated World reviews the evolution of five types of corporate governance and their different sustainability objectives. It discusses the challenges for boards in achieving sustainability from an environmental, economic, employment, and social perspective and introduces the concept of a political tragedy of the commons if boards do what is in the best interests of their profitability only, without considering their responsibilities and unintended consequences for their stakeholders. It explains how volatility, uncertainty, complexity, and ambiguity complicate making sustainable decisions. This book explores ways of helping prevent such negative outcomes. John Zinkin asserts the director's need to reconcile volatility with vision, uncertainty with understanding, complexity with courage and commitment, and ambiguity with adaptability. To prevent a potential political tragedy of the commons, the book suggests new decision-making processes; treating employees differently; and makes the case for reforming capitalism. It is aimed at managers, board members and all those who influence them, including shareholder activists, corporate legal personnel, politicians, activists and general readers interested in applying some of these suggestions in their roles as stakeholders, managers and directors.

This book examines the nature of retail financial transaction infrastructures. Contributions assume a long-term outlook in their exploration of the key financial processes and systems that support a global transition to a cashless economy. The volume offers both modern and historic accounts that demonstrate the constantly changing role of payment instruments. It brings together different theoretical approaches to the study, re-examining and forecasting changes in retail payment systems. Chapters explore a global transition to a cashless society and contemplate future alternatives to cash, cheques and plastic, featuring the perspectives of academics from different disciplines in conversation and industry participants from six continents. Readers are invited to discover the innovation in payment systems and how it co-evolves with changes in society and organisations through personal, corporate and governmental processes.

Since the mid-2000s, India has been beset by widespread farmer protests against land dispossession. Dispossession Without Development demonstrates that beneath these conflicts lay a profound shift in regimes of dispossession. While the postcolonial Indian state dispossessed land mostly for public-sector industry and infrastructure, since the 1990s state governments have become land brokers for private real estate capital. Using the case of a village in Rajasthan that was dispossessed for a private Special Economic Zone, the book ethnographically illustrates the exclusionary trajectory of capitalism driving dispossession in contemporary India. Taking us into the lives of diverse villagers in "Rajpura," the book meticulously documents the destruction of agricultural livelihoods, the marginalization of rural labor, the spatial unevenness of infrastructure provision, and the dramatic consequences of real estate speculation for social inequality and village politics. Illuminating the structural underpinnings of land struggles in contemporary India, this book will resonate in any place where "land grabs" have fueled conflict in recent years.

The third edition of Market-Led Strategic Change builds on the massive success of the previous two editions, popular with lecturers and students alike, presenting an innovative approach to solving an old problem: making marketing happen! In his witty and direct style, Nigel Piercy has radically updated this seminal text, popular with managers, students, and lecturers alike, to take into account the most recent developments in the field. Better Governance Across the Board is a practical guide for achieving good corporate governance of organizations regardless of whether they are for profit, listed, state-owned, family owned, or widely held. It delves into the questions boards must ask if they are to fulfill their fiduciary duties, taking account of regulatory issues. Part 1 defines corporate governance, explaining the four reasons why it matters and how it applies to a wide range of organizations. Part 2 explores the "Five P" framework of Purpose, Principles, Power, People, and Processes that helps boards to create sustainable value. Part 3 concludes by showing how "license to operate" is achieved by boards focusing on the three most important assets of the organization: its reputation; its people; and its processes. This book explores the dilemmas that currently exist in modern approaches to corporate governance and suggests ways of overcoming them. Based on ten years of teaching more than 1,500 directors of publicly listed companies, it integrates key principles of leadership, ethics, branding, and governance into a unique five-factor framework to help directors make good decisions in strategy, risk management, succession planning, internal controls, and stakeholder engagement.
