Prentice Hall Laboratory Manual for Introductory Chemistry ...

The Pearson Laboratory Manual for Introductory Chemistry, 6/E, continues to evolve with increased sensitivity to environmental and safety concerns in the laboratory. In this edition, we have introduced "green chemicals" and a recycle icon appears in the margin of each procedure as a reminder to students that chemicals are to be disposed of in the waste containers provided.

Many metals can react with acid to form hydrogen gas and a metal chloride. This reaction is given by: Equation 1.  $M+nHCl \rightarrow MCl_n+n H_2(g)$  Where M is the metal used and n is the charge on the metal cation. For example, since Ca is an alkaline earth metal, we know it has a charge of +2 when it exists as a cation.
