verbal. The evidence presented by Feinstein et al (2006) suggests that children who start school with more advanced oral language skills fare better in learning to read successfully.

### Research on the importance of early language development

Introduction. The acquisition of language is one of the more remarkable achievements of early childhood. By age 5, children essentially master the sound system and grammar of their language and acquire a vocabulary of thousands of words. This report describes the major milestones of language development that typically-developing, monolingual children achieve in their first 5 years of life and the mechanisms that have been proposed to explain these achievements.

### Language development and literacy | Language Development ...

From birth on, children are programmed to develop speech and language. The first five years are most critical but language development continues throughout early childhood and on into adolescence.

### Language Development in Children - Baby Strategy

Support for language development in early childhood needs to start right at the beginning and in the home. A new study finds that a home environment that supports language development in early childhood—across the first four years of life—predicts children’s readiness to learn in pre-school, which in turn predicts the children’s academic skills in fifth grade (age 10-11).

### Home environment supports language development in early ...

Language Development In Children. Language and communication skills are critical to a child’s development. Good communication makes them better able to engage in socialization as well as learn from formal classroom instruction and the environment around them. Communication involves both speech and language.

### Look Who's Talking! All About Child Language Development

The first five years of a child’s life are the most important in terms of language development, although they continue to develop through the rest of childhood and into adolescence. During the...

### Language Development in Children - Medical News

One child in five starts primary school in England without the language skills they need to succeed, a figure that rises to one in three of the poorest children (Department for Education 2015). This briefing paper presents new findings that show the real consequences for children who are struggling with their language skills.

### Policy brief December 2015 EARLY LANGUAGE DEVELOPMENT AND ...

Language development is a critical part of child development. It supports your child’s ability to communicate, and express and understand feelings. It also supports thinking and problem-solving, and developing and maintaining relationships.

### Language development: children 0-8 years | Raising ...

the child is exposed to both languages regularly before the age of 3. These children develop language similarly to their peers who only speak one language. There is evidence of differences in phonological development. By the age of 5, those differences should disappear.

### Bilingualism in Language Development In Children

As they grow, babies begin to sort out the speech sounds that compose the words of their language. By 6 months of age, most babies recognize the basic sounds of their native language. Children vary in their development of speech and language skills. However, they follow a natural progression or timetable for mastering the skills of language.

### Speech and Language Developmental Milestones | NIDCD
