headache.

2000

~~Management of Chronic Headache~~

Pharmacological management
of cervicogenic headache
typically involves
utilization of:
antidepressants
(specifically, tricyclic,
selective serotonin, and
norepinephrine reuptake
inhibitors) anti-epileptic
medications (eg, gabapentin,
pregabalin, divalproex
sodium, topiramate,
carbamazepine)

~~Cervicogenic Headache: Diagnosis and Management~~

Get Free Management Of Headache And Headache

Headaches are common, and many people treat themselves with simple painkillers, drinking extra water, and having a rest, or simply by waiting for the headache to go away. A headache is one of the most common reasons for attending a doctor's surgery or a neurology clinic. Almost everyone will experience headaches at some time.

~~Headaches | Types, Warning Signs, Causes & Treatment | Patient~~

The intention is that the BASH Headache Management System will encourage a national consistency in approach to caring for

treatments

With a multidisciplinary perspective, The Journal of Headache and Pain covers headache medicine and related pain syndromes in all medical disciplines and particularly encourages clinical, translational and basic science submissions in the areas of pain management, genetics, neurology and internal medicine.

~~The Journal of Headache and Pain | Home page~~

The constant nature of chronic daily headaches makes them one of the most disabling headache conditions. Aggressive

Get Free Management Of Headache And Headache

initial treatment and steady, long-term management might reduce pain and lead to fewer headaches.

~~Chronic daily headaches —
Symptoms and causes — Mayo
Clinic~~

Cluster headaches are a rare type of headache that occur in clusters for a month or two at a time around the same time of year. They're excruciatingly painful, causing intense pain around one eye, and often occur with other symptoms, such as a watering or red eye and a blocked or runny nose.
