Manhattan Project: The Birth of the Atomic Bomb in the ...

The Manhattan Project (1942-1946) resulted in the development and detonation of the first nuclear weapons - and irrevocably changed the course of world events. Born out of a small research programme that began in 1939, the project would eventually employ more than 130,000 people and cost a total of nearly \$2 billion - and it was operated under a shroud of deep secrecy.

The Manhattan Project: The Birth of the Atomic Bomb by Its ...

The Manhattan Project began modestly in 1939, but grew to employ more than 130,000 people and cost nearly US\$2 billion (equivalent to about \$23 billion in 2019). Over 90 percent of the cost was for building factories and to produce fissile material, with less than 10 percent for development and production of the weapons. Research and production took place at more than thirty sites across the United States, the United Kingdom, and Canada.

Manhattan Project - Wikipedia

The Manhattan Project Born from the ashes of Hiroshima was a global movement for nuclear disarmament. But protest against the Bomb began before the devastation of Hiroshima — starting with the very Allied scientists who were building it.
