Nasa: A Human Adventure, is the current exhibition at the Queensland Museum in Brisbane. On a tranquil Sunday morning, our family jumped on the Airport train at the Coomera train station with destination South Brisbane. After about 50 minutes we disembarked at the beautifully restored station and, mum's and dad's bodies in dire need of caffeine, we popped in at the Charming Squire, virtually 50 metres to the left of the train station.

Over 225 colour and black and white photographs from the NASA archives celebrate the 50th anniversary of the first manned moon landing. These pictures, all taken by the Apollo astronauts, create a vivid documentary of one of the most seminal events of the 20th Century. The accompanying text is filled with little-known insider facts and fascinating insights into the Apollo missions.

One of the most ambitious works of paranormal investigation of our time, here is an unprecedented compendium of pre-twentieth-century UFO accounts, written with rigor and color by two of today's leading investigators of unexplained phenomena. In the past century, individuals, newspapers, and military agencies have recorded thousands of UFO incidents, giving rise to much speculation about flying saucers, visitors from other planets, and alien abductions. Yet the extraterrestrial phenomenon did not begin in the present era. Far from it. The authors of Wonders in the Sky reveal a thread of vividly rendered-and sometimes strikingly similar- reports of mysterious aerial phenomena from antiquity through the modern age. These accounts often share definite physical features- such as the heat felt and described by witnesses-that have not changed much over the centuries. Indeed, such similarities between ancient and modern sightings are the rule rather than the exception. In Wonders in the Sky, respected researchers Jacques Vallee and Chris Aubeck examine more than 500 selected reports of sightings from biblical-age antiquity through the year 1879-the point at which the Industrial Revolution deeply changed the nature of human society, and the skies began to open to airplanes, dirigibles, rockets, and other opportunities for misinterpretation represented by military prototypes. Using vivid and engaging case studies, and more than seventy-five illustrations, they reveal that unidentified flying objects have had a major impact not only on popular culture but on our history, on our religion, and on the models of the world humanity has formed from deepest antiquity. Sure to become a classic among UFO enthusiasts and other followers of unexplained phenomena, Wonders in the Sky is the most ambitious, broad-reaching, and intelligent analysis ever written on premodern aerial mysteries.

The Magic of Metaphor presents a collection of stories designed to engage, inspire, and transform the listener and the reader.Some of the stories motivate, some are spiritual, and some provide strategies for excellence. All promote positive feelings, encouraging confi dence, direction, and vision.

James Kakalios explores the scientific plausibility of the powers and feats of the most famous superheroes — and discovers that in many cases the comic writers got their science surprisingly right. Along the way he provides an engaging and witty commentary while introducing the lay reader to both classic and cutting-edge concepts in physics, including: What Superman's strength can tell us about the Newtonian physics of force, mass, and acceleration How Iceman's and Storm's powers illustrate the principles of thermal dynamics The physics behind the death of Spider-Man's girlfriend Gwen Stacy Why physics professors gone bad are the most dangerous evil geniuses!

Offers a comprehensive guide to identifying animals yet to be officially recognized in science, and discusses where these animals live and why they remain a mystery.

Artistic duo Mothmeister have created a place they call "Wounderland". It is a land in which grotesque creatures, in fascinating yet disturbing masks, stare out from barren wastelands, usually accompanied by mounted and stuffed animals. Unconventional and enchanting, the fairytale world of Mothmeister is at once reminiscent of a bygone age, while subtly criticising today's ever-present 'selfie' culture, and the beauty standards imposed by the media. Superlative and unique, the works of Mothmeister are celebrated and revered in this stunning book. AUTHOR: Mothmeister is the ever-changing alter ego of two artistic soulmates and passionate taxidermy enthusiasts. SELLING POINTS: \* A stunning, surreal collections of works, celebrating Mothmeister, a taxidermy-obsessed artistic duo \* Mothmeister boasts over 130,000 followers on Instagram and has participated in several international exhibitions \* Countless eccentric portraits, as well as a unique glimpse behind the mask 240 colour, 30 b/w images

A gifted education Legacy Award winner, Parenting Gifted Kids: Tips for Raising Happy and Successful Children provides a humorous, engaging, and encouraging look at raising gifted children today. James R. Delisle, Ph.D., offers practical, down-to-earth advice that will cause parents to reexamine the ways they perceive and relate to their children. Dr. Delisle puts forward 10 tips to parents of gifted children—ideas that reflect attitude and approach and allow for introspection and change, rather than quick, do-it-tonight solutions. Some topics of interest include understanding a child's giftedness, working with the school system, dealing with perfectionism in gifted kids, and being adult role models for children. Along the way, stories from gifted children and their parents provide insight into the lives of these individuals. What sets this book apart from other books for parents of gifted kids is its expansion beyond mere platitudes. Dr. Delisle's tips go beyond the basics, focusing on attitude, reflection, and subtle changes, rather than specific, cookie-cutter recipes for action. The 10 tips suggested and expanded upon in this book include: understanding what giftedness is . . . and what it is not; understanding the differences between gifted kids and their agemates; understanding the personality traits of gifted kids, including overexcitabilities; taking charge of your child's education; understanding the issue of perfectionism in gifted kids; examining social nuances and myths related to giftedness; examining the similarities parents share with their gifted children; setting reasonable goals; helping gifted children make a difference in the lives of others; and remembering that gifted children are kids first and gifted second. Educational Resource

The story told in this book, which analyzes the presence of Italians in California in the early decades of the twentieth century and the influence they exerted in various sectors (from architecture to art, from crafts to the burgeoning film industry), began in 1915, the year Salvatore Ferragamo arrived in the United States and soon after moved to the sunny West Coast. That same year the Panama-Pacific International Exposition opened in San Francisco, where Marcello Piacentini's Italian Citadel made waves and marked the beginning of the powerful and lasting influence of the Renaissance style on the local architectural language. Against the backdrop of Italian emigration to the States - the fil rouge running through the entire book - and of a Hollywood on its way to becoming the world capital of the young film industry, the volume tells of personalities who were already myths in their day, such as Enrico Caruso, Rudolph Valentino, Lina Cavalieri, and Tina Modotti; cinematic milestones like Cabiria , Ben-Hur , and Romola ; the star system and iconic directors; the important part played by Italian musicians in the birth of jazz; and the thousands of Italians who worked "behind the scenes," making a vital contribution to the creation of the Hollywood myth. This complex story, told both in words and in images, paints a varied and multifaceted picture of the "set" on which the Shoemaker of Dreams began his thrilling creative adventure in America.

A global survey of unknown creatures reported by thousands of eyewitnesses—creatures that have either been verified, refuted, or are still being examined by scientific researchers. \* Nearly 100 entries on the full range of cryptids, organized into categories of types of animals \* Primary sources, including eyewitness accounts of sightings of undocumented creatures \* Sketches of reported hidden animals and photographs of real species uncovered in the pursuit of cryptids \* A "Who's Who" in cryptozoology with brief biographies of major figures in the field \* A wide-ranging bibliography of print and online resources for further exploration \* A comprehensive index of animals (real and speculative), people, places, and discoveries
