Place the plasma cutter where clean cooling air can freely circulate in and out of the front & rear louver vents. Dirt, dust or any foreign material that can be drawn through vents into plasma cutter must be kept to a minimum. Failure to observe these precautions can result in excessive operating temperatures which can lead to plant failure.

How to Use a Plasma Cutter - Beginner Welding Guide

First, turn up the air pressure to about 60 or 65 PSI for 1/8-inch thick hot rolled steel. Push down the knob to make sure the pressure regulator is locked in place. Turn the amperage down to 20 amps at 60 PSI, give that a try. Then cut it at 25 amps and 30 amps and check the quality of the cut.
