Practice chapters then offer a start-to-finish view of treatment, covering such crucial topics as the therapeutic relationship, assessment procedures, goal setting, the sequencing of interventions, how "denial" and "resistance" are addressed, the role of self-help groups, and strategies for preventing and dealing with relapse. Illustrative case examples are included. The volume concludes with three chapters on integrating different techniques to meet patients' needs in a range of clinical settings. Written for a broad audience, this book is an essential text for courses in substance abuse treatment and addiction counseling.
