The aim of the book is to gauge the impact of the general European crisis upon a regional society, and to assess the contribution of agrarian economic and social trends towards that crisis.

This volume offers insights into the current 'public-square' debates on Indian Christianity. Drawing on ethnographic fieldwork as well as rigorous analyses, it discusses the myriad histories of Christianity in India, its everyday practice and contestations and the process of its indigenisation. It addresses complex and pertinent themes such as Dalit Indian Christianity, diasporic nationalism and conversion. The work will interest scholars and researchers of religious studies, Dalit and subaltern studies, modern Indian history, and politics.

Anoxygenic Photosynthetic Bacteria is a comprehensive volume describing all aspects of non-oxygen-evolving photosynthetic bacteria. The 62 chapters are organized into themes of: Taxonomy, physiology and ecology; Molecular structure of pigments and cofactors; Membrane and cell wall structure: Antenna structure and function; Reaction center structure and electron/proton pathways; Cyclic electron transfer; Metabolic processes; Genetics; Regulation of gene expression, and applications. The chapters have all been written by leading experts and present in detail the current understanding of these versatile microorganisms. The book is intended for use by advanced undergraduate and graduate students and senior researchers in the areas of microbiology, genetics, biochemistry, biophysics and biotechnology.
