Two very special right triangle relationships will continually appear throughout the study of mathematics: In an isosceles right triangle, the angle measures are 45 ° -45 ° -90 ° , and the side lengths create a ratio where the measure of the hypotenuse is sqrt (2) times the measure of each leg as seen in the diagram below.

A special right triangle is a right triangle with some regular feature that makes calculations on the triangle easier, or for which simple formulas exist. For example, a right triangle may have angles that form simple relationships, such as 45 ° – 45 ° – 90 ° . This is called an "angle-based" right triangle. A "side-based" right triangle is one in which the lengths of the sides form ratios of whole numbers, such as 3: 4: 5, or of other special numbers such as the golden ratio. Knowing the ...
