The two-volume "Manual of Nursing" is a comprehensive and up-to-date work on the nursing profession in South Africa. It covers the whole nursing curriculum and broadens the student's scope of knowledge by discussing subjects not included in midwifery, critical care nursing, community nursing and psychiatric nursing. Easy referencing ensures that the set (encapsulating the integrated nursing course) is of immediate and practical use. This work discusses medical and surgical conditions from a nursing perspective. Volume One introduces certain basics of nursing theory and practice and it includes a section dealing with nursing-related services.

The two-volume Manual of Nursing is a classic nursing text which broadens the student's scope of knowledge by discussing in-depth aspects of midwifery, critical care nursing, community nursing and psychiatric nursing. Each chapter has introductory notes and self-tests to assist and reinforce learning. Volumes 1 and 2 complement each other and students will find in Volume 2 the information they need to complete their study of subjects covered in Volume 1. Easy referencing ensures that the set (encapsulating the integrated nursing course) is of immediate and practical use. Volume 1 introduces certain basics of nursing theory and practice and includes a section dealing with nursing-related services. Volume 2 expands on the material in Volume 1, covering selected specialist subjects. The Manual of Nursing is an indispensable set, giving the student nurse and nurse practitioner a comprehensive overview of the diseases commonly encountered in a general hospital. Throughout, it emphasises the need to manage the patient as a bio-psycho-social being.

This comprehensive clinical practice manual emphasises evidence-based best practice, focusing on inter-disciplinary care of the child in hospital and community settings. The additional needs of neonates and adolescents are highlighted.
