\*A guide to the press of the United Kingdom and to the principal publications of Europe, Australia, the Far East, Gull States, and the U.S.A.

Continuing the popular Haynes Owners' Workshop Manual space series, which currently comprises Apollo 11 Manual and NASA Space Shuttle Manual, this unique book provides an insight into the only car ever built to be driven on the surface of another world. With a Foreword by the first Apollo astronaut to drive it on the Moon, Dave Scott, and published to coincide with the 40th anniversary of mankind ' s final drive on the Moon in December 2012. The book is part mechanical guide, illustrated with many of the technical drawings from the time, and part narrative-driven story of engineering ingenuity and human triumph. It draws on the rich NASA photographic archive and the complete transcripts of the crews' reaction to driving across the Moon, which the authors have an un-paralleled knowledge and experience of working with.

Vols. for 1951-53 include "Authors" and "Subjects."

Publisher's Note: Products purchased from 3rd Party sellers are not guaranteed by the Publisher for quality, authenticity, or access to any online entitlements included with the product. This unique manual is an ideal resource for anesthesia technicians and technologists and those studying for certification (CerATT) in the field. It offers well-illustrated, comprehensive coverage of every aspect of day-to-day practice and workflow, with sections on Anatomy, Physiology, and Pharmacology; Anesthesia Practice; Anesthesia Equipment and Technology; Emergencies, and more. From explanations of who ' s who in the operating room to detailed, step-by-step instructions on equipment maintenance, this practical manual ensures that readers will have current, complete information on the core knowledge they need to know in anesthesia technology.
