Discussion. C programming is a general-purpose, procedural, imperative computer programming language developed in 1972 by Dennis M. Ritchie at the Bell Telephone Laboratories to develop the UNIX operating system. C is the most widely used computer language. It keeps fluctuating at number one scale of popularity along with Java programming language, which is also equally popular and most widely used among modern software programmers.

## C Tutorial - Tutorialspoint

Why Learn C Programming? C helps you to understand the internal architecture of a computer, how computer stores and retrieves information. After learning C, it will be much easier to learn other programming languages like Java, Python, etc. Opportunity to work on open source projects.
