Individual Service Funds - Dimensions Introduction In 2008 the senior managers in Dimensions were starting to ask the question, what does personal budgets and Individual Service Funds mean for us as an organisation? Dimensions is a not-for-profit organisation which began in 1975 and now supporting over 3,000 people

Individual Service Funds - Dimensions
2)Individual Service Fund (ISF) - An ISF is an internal system of accounting within a service provider that makes the personal budget transparent to the individual or family. This helps provide flexible support by making the organisation accountable to the person, and freeing up the discussion around how their needs might be met.

The definitive guide to Individual Service Funds (ISFs), this book covers both theory and practice, and makes recommendations for service provision, commissioning and policy. It includes helpful analysis of four organisations and partnerships that have introduced ISFs for people with intellectual disabilities, dementia and mental health issues.

The Individual Service Funds Handbook is the definitive guide to one of the most innovative forms of personal budget in health and social care. It gives a clear explanation of what Individual Service Funds (ISFs) are, how to use them effectively and includes all the information you need in order to implement them in your organisation. The Handbook spans a range of settings, including a dementia care home, supported living and residential homes for adults with learning disabilities and people who use mental health services. It also sets out guidelines and templates which can be used when implementing ISFs, addressing key practical concerns including: how to put together effective support plans, and how to ensure that ISFs are delivered in a person-centred way, how to overcome organisational complexities in implementation and supporting managers. A one-stop resource for anyone wanting to understand the potential of ISFs, the Handbook is required reading for service providers, commissioners, and those engaged in person-centred practice and personalisation, including user-led organisations.

Person-centred practices are a key way to provide the best possible care and support for older people and help them to be active and valued members of the community. Drawing on a wealth of experience of working with older people, the authors present the 6 essential person-centred practices. Each of the practices is designed to support the individual and put what is important to and for the person at the forefront of their care. Each practice has been tailored so that older people can express more easily what does and does not work for them. By actively listening and making each person feel appreciated, the practices represent practical tools for frontline practitioners to form good relationships with people in their care. With supporting stories and full colour photographs to illustrate how person-centred thinking and practice is used in real-life settings, there are many examples to help practitioners to overcome challenges and to really implement positive, effective changes to care. This practical book will be a valuable resource for care staff, social workers and healthcare workers who want to learn about person-centred practices to deliver best practice care and support.

Dispelling the myths about how personalisation works for people with dementia living in care homes, this book demonstrates how to introduce Individual Service Funds (ISFs), what works and what doesn't, and how to deal with difficulties and setbacks. Individual Service Funds are one way that people living with dementia can have a personal budget. The authors explain how they went about introducing the principles of ISFs to people living with dementia in a large care home in Stockport, without using any additional funding. They describe the person-centred practices used and the involvement of the council, commissioners, staff and families. Through clear and detailed stories and examples, they demonstrate the dramatic approach to quality of life for people with dementia the approach can deliver. There is a strong emphasis on managerial and organisational issues, including getting staff 'on board', providing adequate support, budgeting, building effective partnerships and implementing change. Providing helpful insights and examples for good practice, this book is essential reading for all those involved in providing personalised care for people with dementia living in care homes, including care staff, care home managers, local authority commissioners, service providers and policy makers.

This edited collection explores areas such as social enterprise, capacity building, volunteering and social value, and charts the historical development of the state-third sector relationship, reviewing the major debates and controversies accompanying recent shifts in that relationship.

Outlining the origins, motivations, strategies, implementations, and effectiveness of reform policies and programs, Handbook of Public Management Practice and Reform examines changes and challenges in major areas of public administration, including budgeting, finance, human resources, and organizational management, reviews the lessons of reform, and addresses new ideas and emerging issues. Discussing the development and contribution of public administration education, research, and professional associations, the book covers decentralization and deregulation, institutional arrangement and support, and cooperation between public and nonprofit organizations.

Social support is the everyday assistance offered by family, friends, neighbours and colleagues, as well as the foundations of support in a range of non-clinical settings, and plays a vital role in a person's mental health and wellbeing. This book examines the nature of social support and offers a practical approach to how it can be enhanced. Focusing on the relationships between service users and supporters, it examines service users' experiences of issues of identity, stigma, social exclusion and social networks. Individual chapters look in depth at how social support is enacted in close relationships, educational institutions and in the world of employment. The nature of 'community' is explored with particular reference to how service users can be supported into greater engagement with social networks. Demonstrating the importance of social perspectives on mental health, this book is essential reading for practitioners, students and educators in mental health, social and community work, community mental health nursing and occupational therapy.

Service user involvement in mental health research poses specific challenges for both researchers and service users. The book describes the relevant background and principles underlying the concept of service user involvement in mental health research, providing relevant practical advice on how to engage with service users and how to build and maintain research collaboration on a professional level. It highlights common practical problems in service user involvement, based on experience from various countries with different social policies and suggests ways to avoid pitfalls and common difficulties. The book helps researchers decide which level of service user involvement will be adequate for their research activities and what will be feasible in view of the practicalities involved. It is also ideal for service users who are interested in becoming involved in research, providing relevant background information on the possibilities of involvement in professional research.

Integration is now a key expectation within the delivery of health and social care services in the UK and internationally. However, it still remains difficult to achieve and sustain in practice. Based on learning from successful, and unsuccessful, integrated care initiatives, this book is an invaluable guide for those responsible for leading, managing and delivering integrated care across health, social care and housing. Written by an experienced team of researchers who have studied, led and supported integrated care for many years Integrated Care in Practice draws on latest evidence, innovative practice and helpful theory. It provides insights into the common pitfalls that such initiatives can encounter and demonstrates positive approaches to anticipating and responding to such challenges. Throughout, real-case examples are provided, and concepts and models are connected with the realities of day-to-day life for those working within these services. Integrated care is a goal to aspire to - this book helps to explain how we can turn this goal into practical action and positive outcomes.
