SAFETY VALVES IN SERIES 3060 tightness on the valve seat. The gasket is made from PTFE (Polytetrafluorethylene), a material that, during the valve's estimated service life, maintains good strength and does not cause the shutter to stick on the seat. The shutter is properly guided in the body and the guide action cannot fail. HANDBOOK - Castel Srl

Introduction A pressure relief valve is a safety device designed to protect a pressure event. An overpressure event refers to any condition which would cause pressure event refers to any condition which would cause pressure event.
