It is often not appreciated that many manual handling injuries are cumulative rather than being directly attributable to any single handling incident. It is, therefore, vitally important that manual handling accidents are reported to Health and Safety Department, so that hazardous operations can be promptly identified and remedial action taken to prevent repetition.

The latest versions are suitable for use in radiotherapy centres and are both for staff areas and for use in waiting rooms to be seen by patients and carers. They remind radiographers and other staff that 40% of at-work injuries are caused by the incorrect or dangerous manual handling of patients. The posters for patients ask for help and co-operation and to let the radiographer know if the patient has a disability or injury that makes it difficult or uncomfortable for them to be moved or ...
