VITAMIN D: Miracle Vitamin: The Ultimate Vitamin D Benefit ...

Approximately 15 minutes per day of sun exposure without SPF protection is vital for correct amounts of vitamin D adsorption. Interestingly, darker skinned folk absorb less sunlight than their lighter-skinned counterparts resulting in less Vitamin D absorption, so those with darker skin should spend a little longer outside.

The main function of vitamin D is to maintain the balance of calcium for the maintenance of strong bones. Vitamin D also plays a key role in boosting the immune system as well as repairing and maintaining DNA and gene regulation. Vitamin D is not present in many foods, in fact, the main source is the sun. Which is why mushrooms are a great source of vitamin D, especially our concentrated mushroom powder.

Vitamin D - The Sunshine Miracle Vitamin: The Ultimate ...

Everyone likes to believe in a miracle vitamin pill and feels "they are doing something". Vitamin D, despite its star status, would not be called a vitamin today, as the doses needed are too large, the body can synthesise it from skin, and it is a steroid precursor. Instead of relying on this impostor, healthy people should get vitamin D from small doses of sunshine every day as well as from food, such as fish, oil, mushrooms and dairy products.
