hi Volvo crawler excavators are manufactured in South Korea the machines use original or licenced production of hydraulics and transmissions, this is the same assembly practice operated by most Asian excavator manufactures. Dont be fooled by the name look at the main parts (Kawaski - Toshiba ect) most are the same.

In the early days, Huntington, New York, was known as part of the Gold Coast of Long Island. It was a busy area boasting summer hotels and docking facilities. Steamboats brought crowds to Huntington from New York City for outdoor fun. Mariners took advantage of landmarks to guide their craft into channels until 1857, when the Lloyd Harbor Light Station was built on a sandspit to guard the entrance of both Lloyd and Huntington Harbors. In 1907, the US Congress appropriated \$40,000 for the construction of a new lighthouse to replace the Lloyd Harbor Light Station, which proved to be ineffective for the navigation of vessels entering Huntington Harbor. The Venetian Renaissance-style structure was completed in 1912 and had the distinctive appearance of a small castle. Thanks to the enormous efforts of the Huntington Lighthouse Preservation Society, Inc., the beauty and uniqueness of the Huntington Harbor Lighthouse has been preserved.

For this book, Frank Raczon dug up the dirt and constructed the only modern history of the world's heaviest machinery. So many things differentiate the Caterpillar brand from its competitors that it can be difficult to know where to begin. From its trademark Caterpillar Yellow to its tradition of making the most rock-solid products on earth, everything about the Caterpillar name is synonymous with the world's toughest machines. In fact, the company's success has led to it being used by economists as a bellwether for the state of the economy as a whole. In *Caterpillar: Modern Earthmoving Marvels*, author Frank Raczon details the largest and most modern earth-moving machines today, with down-to-earth explanations of how and why they work the way they do as well as interviews and quotes from Caterpillar's engineers and operators themselves. Featuring rare historical photography and insight from noted industrial historian Keith Haddock, this book offers a glimpse of how the Caterpillar's meteoric rise from an under-the-radar producer of agrarian and industrial equipment led to its modern status as an international corporate superstar. Filled with excavators, backhoe loaders, motor-graders, off-highway trucks and more, this book is sure to capture the imagination of anyone who has ever passed a construction site and wondered just how the machines work the way they do and what they're truly capable of.

The second book of Shaftal. The country has a ruler again, Karis, a woman who can heal the war-torn land and expel the invaders. But she lives in obscurity with her fractious found family. With war and disease spreading, Karis must act. And when Karis acts, the very stones of the earth sit up and take notice.
