Do you know what "quatrefoil" and "impolitic" mean? What about "halcyon" or "narcolepsy"? This book is a handy, easy-to-read reference guide to the proper parlance for any situation. In this book you will find: Words You Absolutely Should Know (covert, exonerate, perimeter); Words You Should Know But Probably Don't (dour, incendiary, scintilla); Words Most People Don't Know (schlimazel, thaumaturgy, epergne); Words You Should Know to Sound Overeducated (ad infinitum, nugatory, garrulity); Words You Probably Shouldn't Know (priapic, damnatory, labia majora); and more. Whether writing an essay, studying for a test, or trying to impress friends, family, and fellow cocktail party guests with their prolixity, you will achieve magniloquence, ebullience, and flights of rhetorical brilliance.

Presenting a fascinating insider's view of U.S.A.F. special operations, this volume brings to life the critical contributions these forces have made to the exercise of air & space power. Focusing in particular on the period between the Korean War & the Indochina wars of 1950-1979, the accounts of numerous missions are profusely illustrated with photos & maps. Includes a discussion of AF operations in Europe during WWII, as well as profiles of Air Commandos who performed above & beyond the call of duty. Reflects on the need for financial & political support for restoration of the forces. Bibliography. Extensive photos & maps. Charts & tables.

This book explores a range of plausible futures for environmental law in the new era of the Earth's history: the Anthropocene. The book discusses multiple contemporary and future challenges facing the planet and humanity. It examines the relationship between environmental law and the Anthropocene at governance scales from the global to the local. The breadth of issues and jurisdictions covered by the book, its forward-looking nature, and the unique generational perspective of the contributing authors means that this publication appeals to a wide audience from specialist academics and policy-makers to a broader lay readership.

Following an introduction to biogenic metal nanoparticles, this book presents how they can be biosynthesized using bacteria, fungi and yeast, as well as their potential applications in biomedicine. It is shown that the synthesis of nanoparticles using microbes is eco-friendly and results in reproducible metal nanoparticles of well-defined sizes, shapes and structures. This biotechnological approach based on the process of biomineralization exploits the effectiveness and flexibility of biological systems. Chapters include practical protocols for microbial synthesis of nanoparticles and microbial screening methods for isolating a specific nanoparticle producer as well as reviews on process optimization, industrial scale production, biomolecule-nanoparticle interactions, magnetosomes, silver nanoparticles and their numerous applications

Low-intensity conflict (LIC) often has been viewed as the wrong kind of warfare for the American military, dating back to the war in Vietnam and extending to the present conflicts in Iraq and Afghanistan. From the American perspective, LIC occurs when the U.S. military must seek limited aims with a relatively modest number of available regular forces, as opposed to the larger commitments that bring into play the full panoply of advanced technology and massive commitments of troops. Yet despite the conventional view, U.S. forces have achieved success in LIC, albeit "under the radar" and with credit largely assigned to allied forces, in a number of counterinsurgency wars in the 1960s. "Scenes from an Unfinished War: Low-Intensity Conflict in Korea, 1966-1969" focuses on what the author calls the Second Korean conflict, which flared up in November 1966 and sputtered to an ill-defined halt more than three years later. During that time, North Korean special operations teams had challenged the U.S. and its South Korean allies in every category of low-intensity conflict - small-scale skirmishes along the Demilitarized Zone between the two Koreas, spectacular terrorist strikes, attempts to foment a viable insurgency in the South, and even the seizure of the USS Pueblo - and failed. This book offers a case study in how an operational-level commander, General Charles H. Bonesteel III, met the challenge of LIC. He and his Korean subordinates crafted a series of shrewd, pragmatic measures that defanged North Korea's aggressive campaign. According to the convincing argument made by "Scenes from an Unfinished War," because the U.S. successfully fought the "wrong kind" of war, it likely blocked another kind of wrong war - a land war in Asia. The Second Korean Conflict serves as a corrective to assumptions about the American military's abilities to formulate and execute a winning counterinsurgency strategy. Enslaved by a mute-race of cruel dictators, Razvan learns their touch-language and works as a translator in order to survive. But war is on the horizon and his quiet life is about to get noisy... When he was a boy, Razvan trained as a translator for the hated Keda, the mute enslavers of his city, Val Kedi?. They are a cruel race who are quick to anger. They keep a tight hold on the citizens of Val Kedi? by forcing their children to be sent to work in the dangerous mines of the city from the age of eleven until eighteen. By learning fingerspeak – the Keda's touch language – Razvan was able to avoid such a punishment for himself and live a life outside the harsh climate of the slums. But the same could not be said for his son... Now a man, Razvan has etched out a quiet life for himself as an interpreter for the Keda court. He does not enjoy his work, but keeps his head down to protect his son, held hostage in the Keda's mines. The Keda reward any parental misdemeanors with extra lashings for their children. Now the city is under siege by a new army who are perhaps even more cruel than their current enslavers. At the same time, a mysterious rebellion force has reached out to Razvan with a plan to utilize the incoming attack to defeat the Keda once and for all. Razvan must decide which side to fight on, who can be trusted, and what truly deserves to be saved. File Under: Fantasy [ Linguistical Nightmare | Camun Willing | Knuckle Up | Silence isn't Golden ]
